jQuery

Lecture 1

Lab

Lab1:

- Write the text "Hello jQuery" in an <h1> element
- Write an element with id = "welcome" and write "java script " as text in it
- Then replace the word "javascript" with the word "jQuery".
- Write two elements with class="my-class", in the first one, write the word "first" and in the second one, write the word "second"
- Write div with 5 paragraph tags as childs in it
- Loop through the <p> elements that are inside the <div> and write the paragraph number before its content like this:

  1-This is a paragraph

  2-This is a paragraph

  3-This is a paragraph

  4-This is a paragraph

  5-This is a paragraph

- In the following code:
- <h2> Names: </h2>
-    Ahmed
- Mohamed
- Mahmoud
- <h2> Departments: </h2>
- IT
- Sales
- HR
- <h2> References </h2>
- Google
- Wikipedia
- **Color the first <li> in both <ul> elements with "red" color (Ahmed,IT)**
- **Select the anchor tag elements (<a> elements) whose href attribute ends with .org. Then set the href attribute to http://www.yahoo.com**
